

Pedoclimatic dataset, Indonesia

Deliverable A2: Pedoclimatic data description.

Project RFP No.: 2022-007

Jonathan Pierre, CEO, jon@geotree.com

Table of Contents

Table of Contents	1
Climate data	2
○ Precipitation	3
○ Temperature	6
○ Evapotranspiration	9
Soil data	12
○ Soil Organic Carbon	12
○ Clay	13
○ Bulk density	14
○ Soil loss	15

Climate data

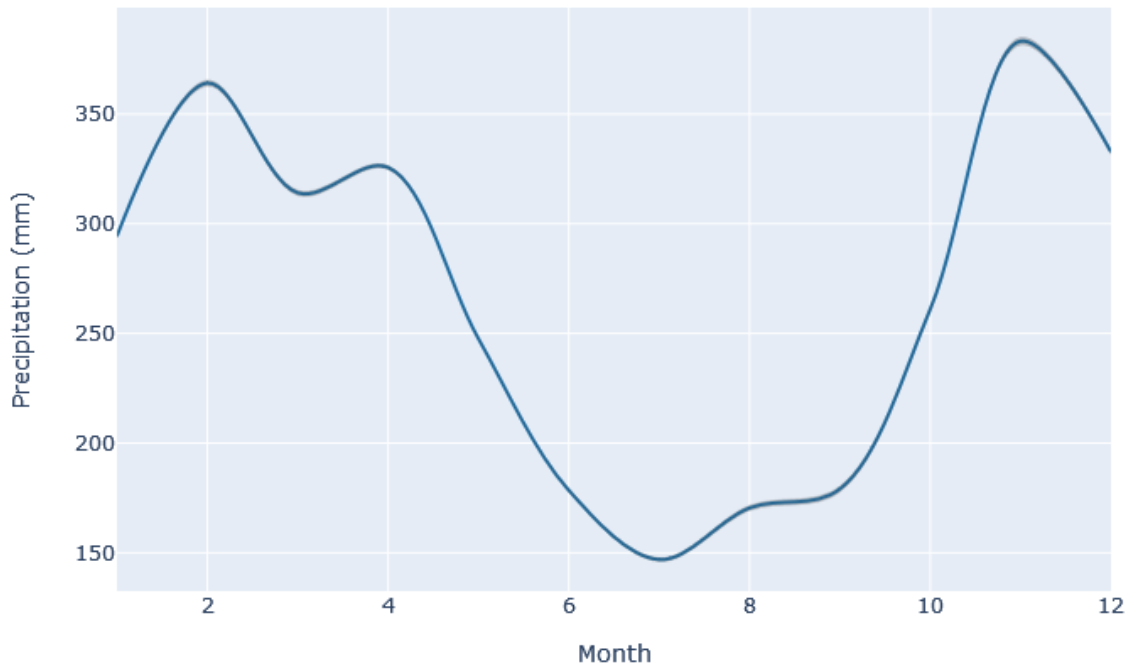

Geographical distribution of coffee-growing regions across provinces

○ Precipitation

Dataset	Precipitation (mm)
Spatial resolution	10 km
Temporal resolution	Monthly
Temporal Coverage	2012-2022
Source	ECMW – ERA5

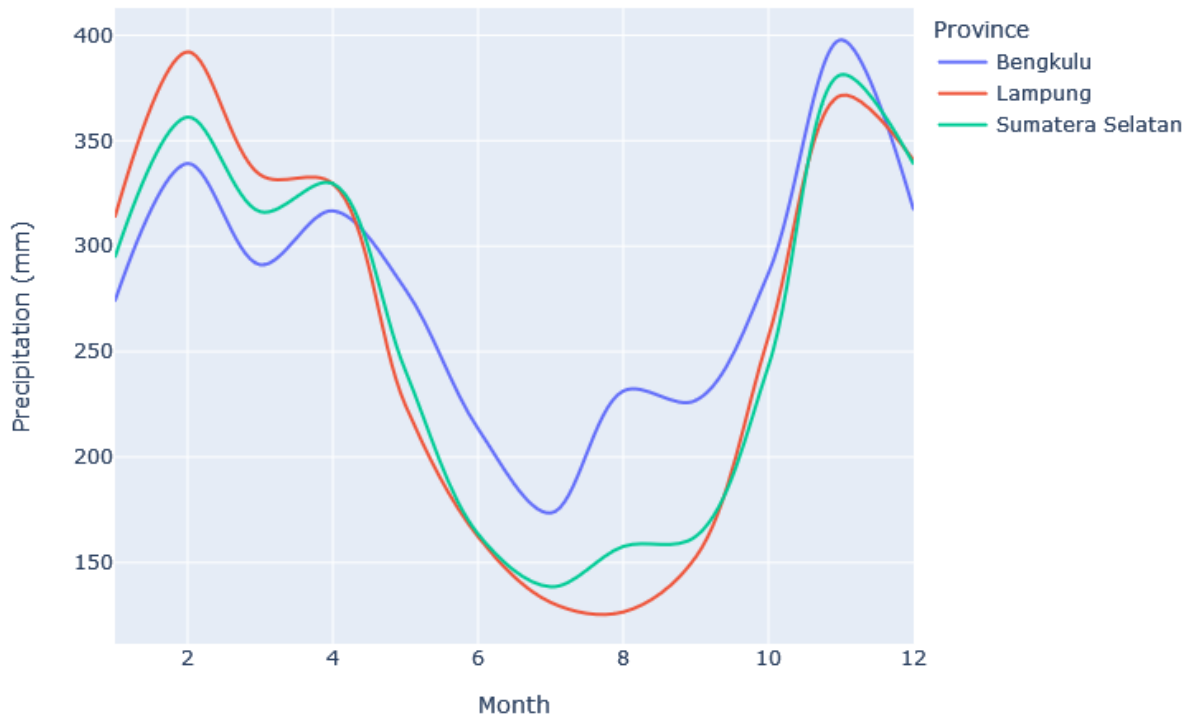

Overall monthly average

Overall annual average

Provincial level monthly average

Province level annual average

- **Temperature**

Dataset	Temperature (C)
Spatial resolution	10 km
Temporal resolution	Monthly
Temporal Coverage	2012-2022
Source	ECMW – ERA5

Overall average

Overall annual average

Provincial level monthly average

Province level annual average

○ **Evapotranspiration**

Dataset	Evapotranspiration (mm)
Spatial resolution	10 km
Temporal resolution	Monthly
Temporal Coverage	2012-2022
Source	ECMW – ERA5

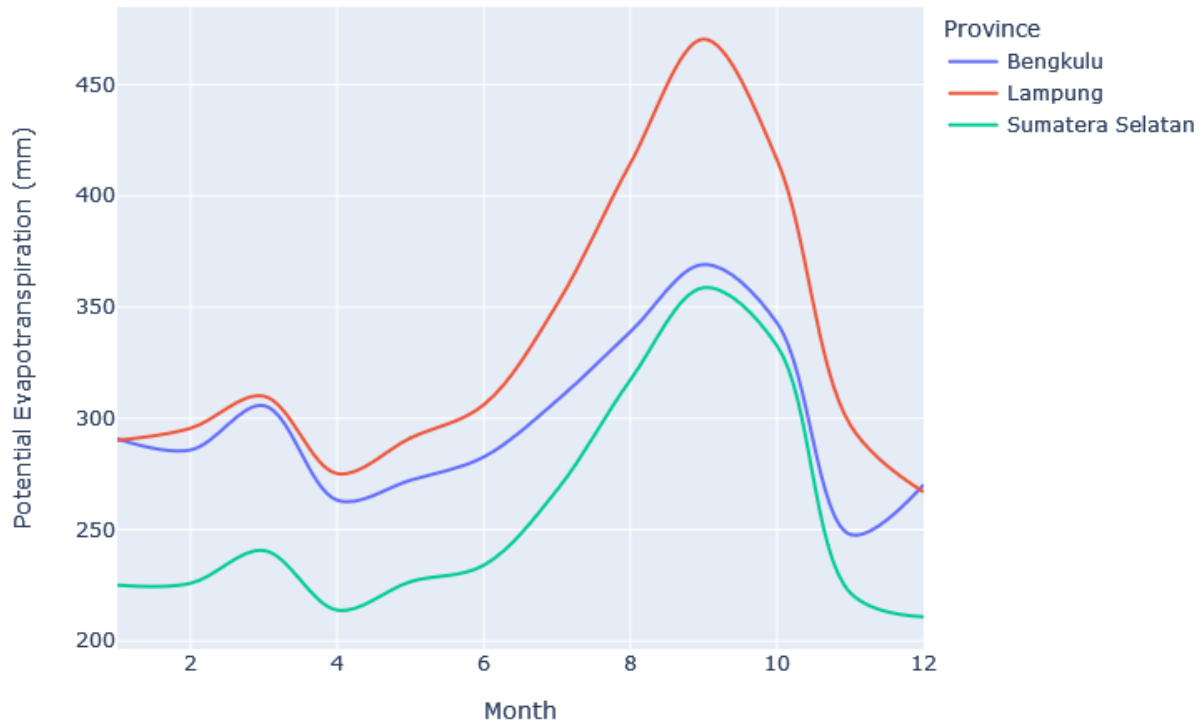

Overall average

Overall annual average

Provincial level monthly average

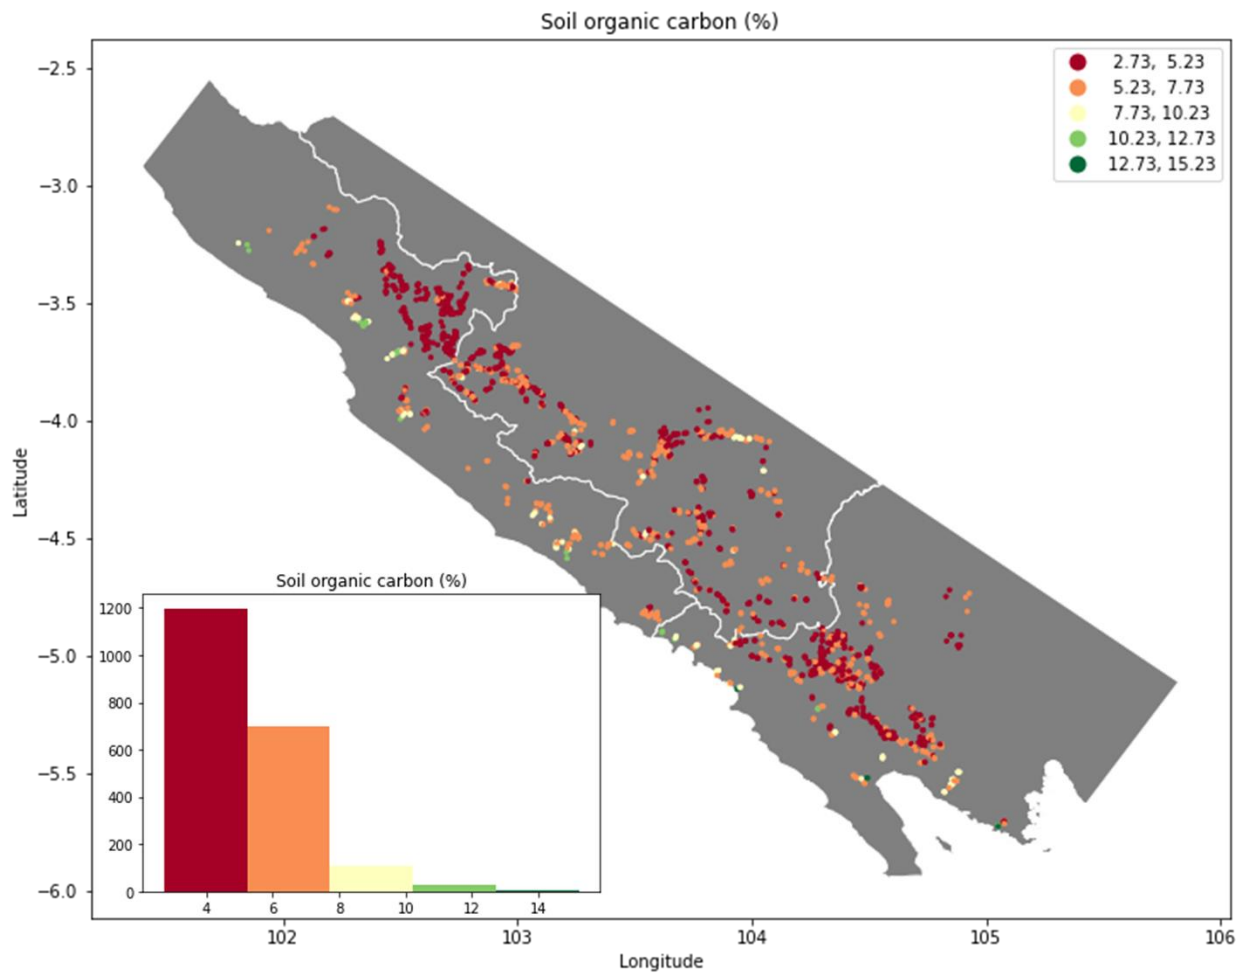

Province level annual average

Soil data

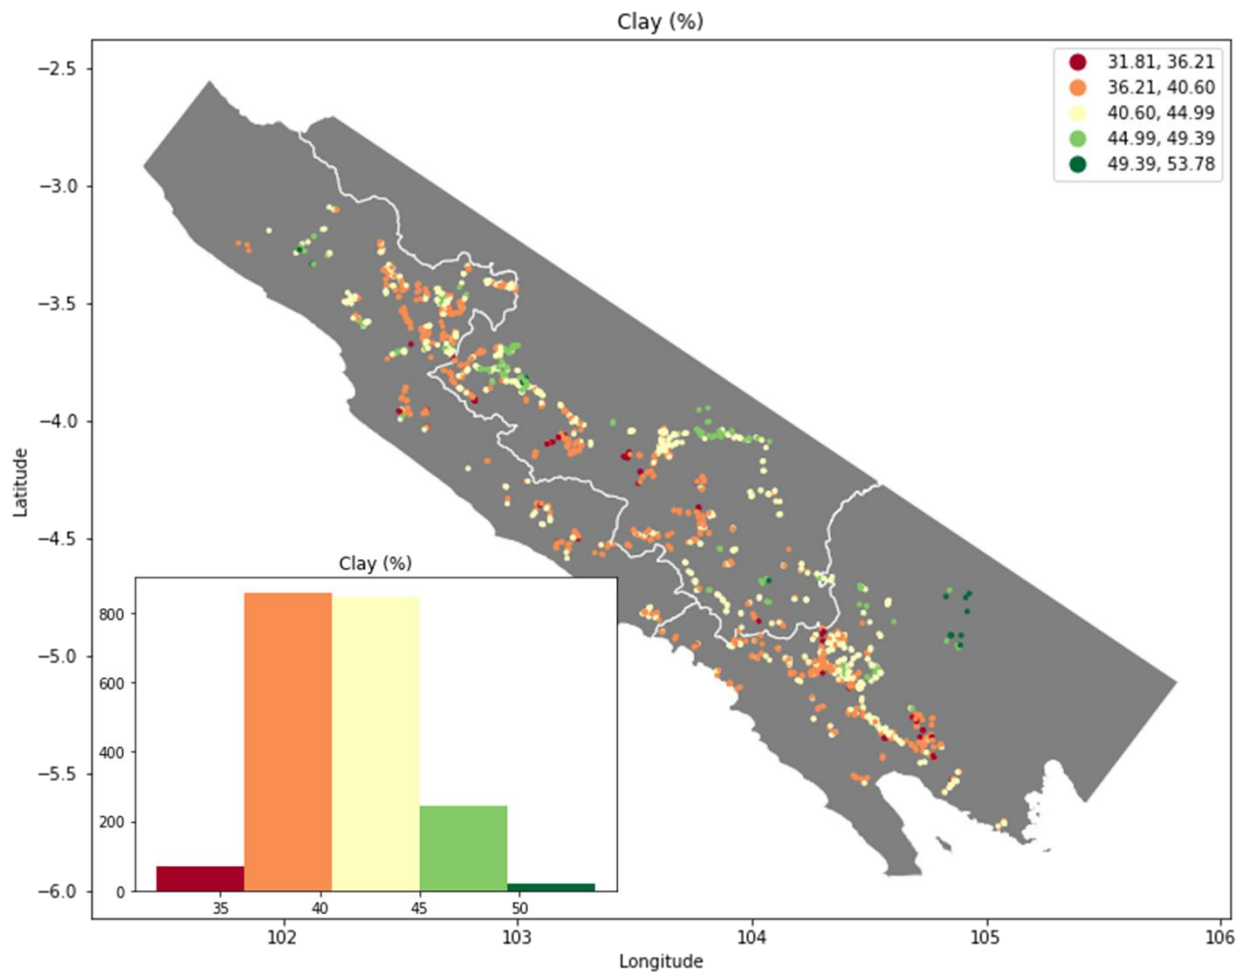

- Soil Organic Carbon

Dataset	Soil organic carbon (%)
Spatial resolution	250 m
Source	ISRIC - Soil Grids

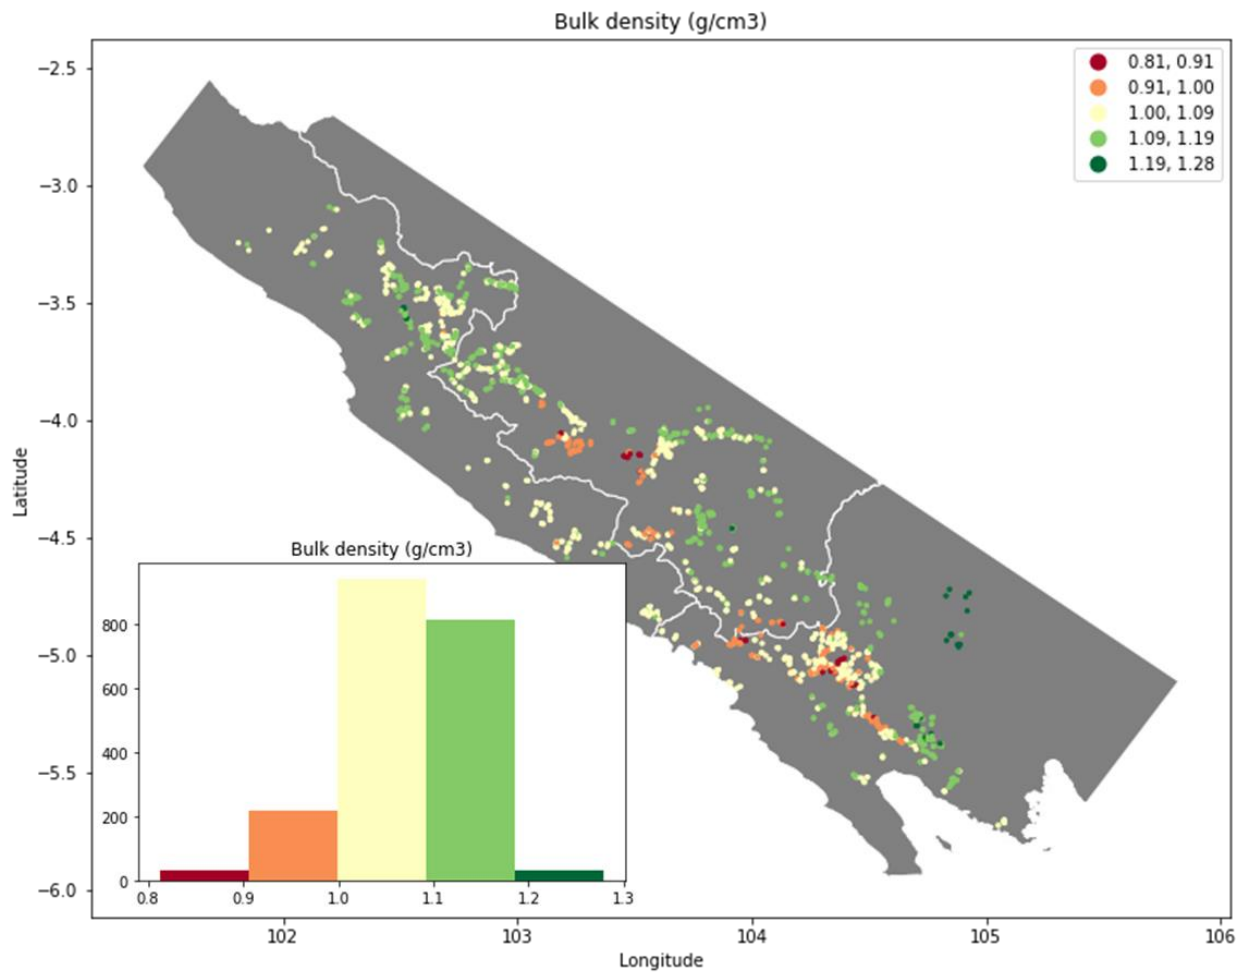

○ Clay

Dataset	Clay (%)
Spatial resolution	250 m
Source	ISRIC - Soil Grids

○ Bulk density

Dataset	Bulk density (g/cm ³)
Spatial resolution	250 m
Source	ISRIC - Soil Grids

○ Soil loss

Dataset	Soil loss (t/ha/yr)
Spatial resolution	25 km
Source	GloSEM - Soil Erosion
